Empower+ for Groups with 1-150 Members

A Complete Solution for a Healthier Workforce

Health Advisor

A care team, led by a health advisor, addresses the mental, physical and emotional aspects of health issues for the most costly and complex cases.¹ Members can interact with their health advisor through email, secure messaging or scheduling a callback. Health advisors may also send text message reminders.

Advanced Analytics

State-of-the-art algorithms help health advisors identify members earlier in their health journey when interventions can have the greatest impact on health outcomes and cost of care. Expanded targeting evaluates more conditions and identifies more high-cost and potential high-cost claimants than Enable.

Empower+ Package Highlights

- A blend of high-tech and high-touch
- Expanded targeting, outreach and interventions compared to Enable

Targeted Messaging

Automated touch points triggered by missed appointments, tests and prescription refills help engage members across the health spectrum. Educational messages encourage members with chronic conditions, such as diabetes and asthma, to take actions to improve their health.
